Milk Frother Cleaner Concentrate Solution

For Use With:
Milk Frother Wand

Directions for Cleaning Internal Foam Frother

1. Place cleaning container under the frother wand.
2. Disconnect dairy beverage from the system.
3. In a second cleaning container, mix 1 oz (30 ml) of Milk Frother Cleaner Concentrate Solution with 16 oz (473 ml) of clean, warm water and pour into the container under the frother wand.
4. Insert milk frother suction tube directly into the diluted Milk Frother Cleaner Concentrate Solution solution.
5. Run the entire solution through the frother.
6. Thoroughly rinse all components by running 16 oz (473 ml) of cold water through the system.

Directions for Cleaning External Milk Frother Wand

1. In a cleaning container, mix 1 oz (30 ml) of milk frother cleaner with 16 oz (473 ml) of clean, warm water.
2. Run steam cycle.
3. Soak the wand in the cleaning solution for 15-30 minutes.
4. Thoroughly rinse all components with clean water.
